

Energy saving

How to make your battery last longer and therefore save the energy for our planet?

- 1. Make sure you follow the complete charge time (minimum 3 hours).
- 2. After a partial charge, the battery level indicator may not be exact. Wait for at least 20 minutes after removing the charger to obtain an exact indication.
- 3. Adjust the brightness of screen as appropriate.
- 4. Extend the email auto-check interval for as long as possible.
- 5. Update news and weather information on manual demand, or increase their auto-check interval.
- 6. Exit background-running applications if they are not being used for a long time.
- 7. Deactivate Bluetooth, Wi-Fi, or GPS when not in use.
